Evidence-Based Sterilization Practices Series

Unveiling Surgical Implant Mastery: Celebrating QIP Excellence in 2024

The Central Sterile Supply Department (CSSD) and Operating Room (OR) play a crucial role in managing loaned surgical instruments and implants from external organizations or companies. Implementing systematic management processes and Quality Improvement Programs (QIPs) can enhance collaboration, communication, and accountability, ensuring proper decontamination and sterilization of loaned instruments, ultimately leading to improved patient safety.

We warmly invite you to participate in the Asia Safe Surgical Implant Education Webinar. This event offers the opportunity to learn from Prof. Wing Hong Seto and Ms. Patricia Ching about the latest sterilization guidelines, consensus documents, and recommended practices.

Join us for this exciting, educational, and transformative experience!

Learning objectives:

1. Update your knowledge on Quality Improvement Programs for loaned surgical instruments and implants.
2. Explore recommended practices for sterilization monitoring and consensus documentation.
3. Be a part of the grand announcement of the Quality Improvement Programs (QIP) winners.

Webinar Time in Various Locations

Prof. Wing Hong Seto

Co-Director, WHO Collaborating Centre for Infectious Disease Epidemiology and Control, School of Public Health, The University of Hong Kong

Prof Seto is the Founding President of the Asia Pacific Society of Infection Control (APSIC). Besides being Honorary Professor for the University of Hong Kong and the Hong Kong Polytechnic University, he is also a visiting professor for the University of New South Wales.

He is also the past Chairman of the Scientific Committee on Infection Control of the Centre for Health Protection of HKSAR Government. He has authored over a hundred and fifty research papers including the book "Infection Control for the Asian Healthcare Worker". Many international societies had invited him to speak on Infection Control.

The WHO has also regularly assigned him as advisor for various projects in Infection Control, Antibiotics Resistance and a core group member for the WHO Hand Hygiene guideline.

Ms. Patricia Ching
